Career Objective

Computer Science and Data Science undergraduate with hands-on experience in building AI chatbots, full-stack web, and mobile applications. Interested in Artificial Intelligence, RAG-based systems, and Flutter development, with practical knowledge of REST APIs, databases, and Git. A quick learner and problem solver seeking an entry-level software or AI developer role to apply technical skills and continue learning.

EXPERIENCE

Apsis Solutions —Mobile Application Development (Internship) **Feb 2026-Present**

•Developed Flutter apps including a home-automation control app and a real-time weather app using REST APIs.
•Connected mobile frontend with backend services and created basic Django API endpoints; handled API responses, state management, and error handling.
•Resolved runtime issues, improved app performance, and collaborated using Git version control.

PROJECTS

AI POWERED STUDENT LEARNING PLATFORM USING RAG WITH LANGCHAIN

•Developed a full-stack academic chatbot that answers queries from uploaded documents using semantic search.
•Implemented document ingestion pipeline (text extraction, chunking, embeddings) for vector-based retrieval.
•Added authentication, chat history storage, and real-time messaging.
•Designed modular REST backend and integrated AWS services for scalable document Q&A.
Tech Stack: MERN Stack, LangChain, Gemini API, AWS S3, Socket.IO

DDOS DETECTION IN SDN WITH ML

•Built a machine-learning based intrusion detection model to classify abnormal network traffic.
•Performed data preprocessing, feature selection, and model training using Scikit-learn.
•Visualized attack detection results and evaluated model performance using classification metrics.
Tech Stack: Python, Scikit-learn, Pandas, Matplotlib

WEATHER MOBILE APPLICATION

•Developed a cross-platform Flutter weather app with GPS location detection and city search; integrated multiple REST APIs for real-time, hourly, and 15-day forecasts.
•Implemented state management using Provider and local persistence for saved cities, including caching, offline fallback, rain alerts, and network error handling.
Tech Stack: Flutter, Provider, REST APIs, OpenWeatherMap,

TECHNICAL SKILLS

Languages: Python, JavaScript, Dart, C
Backend & Databases: REST APIs,Flask ,Node.js (MERN), Django, MySQL
AI/ML: Retrieval-Augmented Generation (RAG), LangChain, LLM APIs, Prompt Engineering
Tools: Git, GitHub, AWS S3, Socket.IO, API Integration
Frontend & Mobile: Flutter, Web Development

EDUCATION

ATME College of Engineering, Mysuru **2022-26**
Bachelor of Engineering in CSE (Data Science)- 8.37 CGPA

JSS PU College, SJCE Campus, Mysuru **2020-22**
PCMB-91.17%

ADDITIONAL INFORMATION

• **Python Foundations Certification — Infosys Springboard,Data Engineering Training — IVIS Lab**
•**Published research paper** ***"A Review on RAG-Based Student Assistant Chatbot using LangChain"*** **in** EPRA International Journal of Research and Development (IJRD), Vol.10, Issue 8, Aug 2025
DOI: https://doi.org/10.36713/epra23698
• **Languages Known**: English (Professional), Kannada (Native),Hindi (Limited)
