CAREER OBJECTIVE

Computer Science and Data Science graduate with hands-on experience in developing AI chatbots, full-stack web applications, and mobile applications. Skilled in Artificial Intelligence, Retrieval-Augmented Generation (RAG) systems, Flutter development, REST APIs, databases, and Git. Strong problem-solving abilities, adaptability, and a passion for learning new technologies. Seeking an entry-level Software Developer or AI Developer role to apply technical expertise, contribute to innovative projects, and grow within a dynamic development environment.

EXPERIENCE

Apsis Solutions

Feb 2026 – May 2026

Mobile Application Development Intern

Bengaluru, India

- Developed cross-platform Flutter applications, including an IoT-based home automation system for real-time device monitoring and control.
- Built and integrated RESTful APIs using Flask, enabling seamless communication between mobile applications and backend services with effective state management and error handling.
- Optimized application performance, resolved runtime issues, and collaborated using Git for version control and efficient development workflows.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, C, Dart

Frontend: HTML, CSS, React

Backend: Django, Django REST Framework, FastAPI, Flask

AI & LLM: LangChain, Retrieval-Augmented Generation (RAG), Prompt Engineering, Google Cloud Console

Databases: MySQL, MongoDB, Firebase Realtime Database

Tools: Git, GitHub, Postman, VS Code

Cloud: AWS (Basics), Docker (Basics)

PROJECTS

AI-Powered Student Learning Platform

GitHub | Live Demo

- Built a full-stack AI-powered learning platform enabling students to upload PDF, DOCX, and PPTX documents for context-aware Q&A, quiz generation, flashcards, and personalized study plans.
- Implemented a Retrieval-Augmented Generation (RAG) pipeline using LangChain, Gemini **text-embedding-004**, and ChromaDB with semantic chunking and MMR-based retrieval to generate accurate, citation-backed responses.
- Engineered real-time AI chat using Django Channels and WebSockets with streaming responses and optimized vector indexing to improve retrieval performance and reduce response latency.
- Designed role-based dashboards for students, teachers, and administrators with analytics, assignment management, YouTube video integration, and prompt-engineered AI responses.
- **Tech Stack:** Python, Django, Django REST Framework, LangChain, Gemini 2.0 Flash, MongoDB, MySQL.

IoT Home Automation Application

GitHub

- Developed a cross-platform Flutter application for real-time smart home automation, enabling seamless monitoring and control of IoT devices.
- Integrated Firebase Realtime Database, Firebase Authentication, Wi-Fi, and BLE communication for secure authentication and live device synchronization.
- Implemented Provider-based state management, device scheduling, and REST API integration to improve application reliability and user experience.
- Optimized application performance and responsiveness, ensuring stable operation across multiple concurrent IoT device interactions.
- **Tech Stack:** Flutter, Dart, Firebase Realtime Database, Flask, BLE, Wi-Fi

EDUCATION

ATME College of Engineering

Mysuru, India

Bachelor of Engineering in Computer Science and Engineering (Data Science)

2022 – 2026

– CGPA: 8.57 / 10

JSS PU College, SJCE

Mysuru, Karnataka

Pre-University Course (PCMB)

2020 – 2022

– Percentage: 91.17%

PUBLICATIONS & CERTIFICATIONS

Research Paper: “A Review on RAG-Based Student Assistant Chatbot using LangChain” — EPRA IJRD, Vol.10, Issue 8, Aug 2025. DOI: 10.36713/epra23698

Certifications: Python Foundations — Infosys Springboard | Data Engineering Training — IVIS Lab

Languages: English (Professional), Kannada (Native), Hindi (Limited)
